(a) No interaction
Biosphere Integrity
Land-system change
Stratospheric ozone depletion
Biogeochemical flows-N
Biogeochemical flows-P
Freshwater use
Atmospheric aerosol loading
Ocean acidification
Climate change CO2 Concentration
Climate change Energy imbalance

100
%
market for natural gas, high pressure
hydrogen production, steam methane reforming, with CCS
chemical factory construction, organics
carbon dioxide, captured at hydrogen production plant, pre, pipeline 200km, storage 1000m
market for hard coal
electricity production, nuclear, pressure water reactor, heavy water moderated
market for water, deionised
hydrogen production, coal gasification, with CCS
Others
