(a) No interaction
Biosphere Integrity
Land-system change
Stratospheric ozone depletion
Biogeochemical flows-N
Biogeochemical flows-P
Freshwater use
Atmospheric aerosol loading
Ocean acidification
Climate change CO2 Concentration
Climate change Energy imbalance
0
20

80
100
%
electricity production, wind, >3MW turbine, onshore
electricity production, solar thermal parabolic trough, 50 MW
market for natural gas, high pressure
electricity production, photovoltaic, 570kWp open ground installation, multi-Si
hydrogen production, steam methane reforming, with CCS
electrolyzer production, 1MWe, AEC, Stack
market for water, deionised
market for water, deionised
transmission network construction, electricity, high voltage
market for tetrafluoroethylene
Others
