(a) No interaction
Biosphere Integrity
Land-system change
Stratospheric ozone depletion
Biogeochemical flows-N
Biogeochemical flows-P
Freshwater use
Atmospheric aerosol loading
Ocean acidification
Climate change CO2 Concentration
Climate change Energy imbalance
0

80
100
%
biomethane production, from biogas upgrading, using amine scrubbing
hydrogen production, steam methane reforming, from biomethane
hydrogen production, steam methane reforming, from biomethane, with CCS
chemical factory construction, organics
market for water, deionised
market for zeolite, powder
carbon dioxide, captured at hydrogen production plant, pre, pipeline 200km, storage 1000m
market for wood chips, wet, measured as dry mass
Others
